Employment Insight Information Source

This Employment Insight contains the latest estimates for employment, unemployment, economic inactivity, claimant count, average earnings, labour productivity, vacancies and labour disputes. The estimates are used by a wide range of users, particularly across government and the media, to monitor developments in the labour market. All estimates discussed in this Statistical Bulletin are for the United Kingdom and are seasonally adjusted except where otherwise stated. Most of the figures discussed in this Employment Insight are obtained from surveys of households or businesses and are therefore estimates, not precise figures.

Key indicators from September to November 2011:

The employment rate for those aged from 16 to 64 was 70.3 per cent, down 0.1 on the quarter. There were 29.12 million people in employment aged 16 and over, up 18,000 on the quarter..

The unemployment rate was 8.4 per cent of the economically active population, up 0.3 on the quarter. There were 2.68 million unemployed people, up 118,000 on the quarter. The unemployment rate has not been higher since 1995 and the number of unemployed people has not been higher since 1994.

The inactivity rate for those aged from 16 to 64 was 23.1 per cent, down 0.2 on the quarter. There were 9.29 million economically inactive people aged from 16 to 64, down 61,000 on the quarter.

Total pay (including bonuses) rose by 1.9 per cent on a year earlier, down 0.2 on the three months to October 2011 (with both the private and public sectors showing lower pay growth).

Summary

The employment rate for those aged from 16 to 64 for the three months to November 2011 was 70.3 per cent, down 0.1 percentage point on the quarter. The number of people in employment aged 16 and over increased by 18,000 on the quarter and by 26,000 on the year to reach 29.12 million.

The number of employees fell by 109,000 over the quarter to reach 24.79 million. The number of self-employed people increased by 101,000 on the quarter to reach 4.12 million. The number of people in other categories of employment increased by 26,000 over the quarter to reach 210,000. The number of people in full-time employment fell by 57,000 over the quarter to reach 21.26 million but the number of people in part-time employment increased by 75,000 to reach 7.86 million. The number of employees and self-employed people who were working part-time because they could not find a full-time job increased by 44,000 on the quarter to reach 1.31 million, the highest figure since comparable records began in 1992.

The unemployment rate for the three months to November 2011 was 8.4 per cent of the economically active population, up 0.3 on the quarter. The unemployment rate was last higher in the three months to November 1995. The total number of unemployed people increased by 118,000 over the quarter to reach 2.68 million. The number of unemployed people was last higher in the three months to August 1994. The number of unemployed people aged from 16 to 24 increased by 52,000 over the quarter to reach 1.04 million; this figure includes 313,000 people in full-time education who were looking for work. T

he unemployment level for people aged from 16 to 24 was the highest since directly comparable records began in 1992. However earlier data, calculated on a slightly different basis, indicates that the level of youth unemployment was higher in the mid-1980s. The inactivity rate for those aged from 16 to 64 for the three months to November 2011 was 23.1 per cent, down 0.2 on the quarter. The number of economically inactive people aged from 16 to 64 fell by 61,000 over the quarter to reach 9.29 million. This quarterly fall in economic inactivity was mainly due to fewer women looking after the family or home (down 44,000) and fewer retired people below the age of 65 (down 34,000).

There were 1.60 million people claiming Jobseeker's Allowance (JSA) in December 2011, up 1,20 on November. The number of people claiming JSA for up to six months fell by 16,500 between November and December to reach 928,200.

In November 2011, there were 988,000 working days lost due to labour disputes, the highest figure since July 1989. Most of the working days lost in November 2011 were due to a one day strike on 30 November called by several trade unions in connection with a dispute over proposed changes to pension schemes for some public sector workers.

Employment

The employment rate for men aged from 16 to 64 was 75.2 per cent, down 0.2 percentage points on the previous quarter. The corresponding employment rate for women was 65.4 per cent, down 0.1 percentage point on the previous quarter.

The number of people in employment was 29.12 million in the three months to November 2011, up 18,000 from the three months to August 2011 and up 26,000 on a year earlier. The number of people in full-time employment was 21.26 million in the three months to November 2011, down 57,000 from the three months to August 2011. Of this total, 13.57 million were men and 7.69 million were women. The number of people in part-time employment was 7.86 million in the three months to November 2011, up 75,000 from the three months to August 2011. Of this total, 2.01 million were men and 5.84 million were women.

The number of people in public sector employment was 5.99 million in September 2011, down 67,000 from June 2011. The number of people in private sector employment in September 2011 was 23.12 million, up 5,000 from June 2011.

UK Employment Insight

ONS publishes estimates of employment by both country of birth and by nationality. The number of non-UK born people in employment is greater than the number of non-UK nationals in employment, as the non-UK born series includes many UK nationals. The estimates relate to the number of people in employment rather than the number of jobs. These statistics have sometimes been incorrectly interpreted as indicating the proportion of new jobs that are taken by foreign migrants. The number of UK nationals in employment was 26.60 million in the three months to September 2011, down 280,000 on a year earlier. The number of non-UK nationals in employment was 2.56 million, up 147,000 from a year earlier.

The employment rate for UK nationals aged from 16 to 64 was 70.7 per cent in the three months to September 2011, down 0.6 percentage points on a year earlier. The corresponding employment rate for non-UK nationals was 68.3 per cent, unchanged on a year earlier.

The number of UK born people in employment was 25.08 million in the three months to September 2011, down 311,000 on a year earlier. The number of non-UK born people in employment was 4.08 million, up 181,000 from a year earlier. The employment rate for UK born people aged from 16 to 64 was 71.1 per cent in the three months to September 2011, down 0.5 percentage points on a year earlier. The corresponding employment rate for non-UK born people was 67.3 per cent, down 0.5 percentage points on a year earlier.

Employment by country of birth and nationality, changes on year between September to November 2011.

Actual hours worked

Actual hours worked measures the number of hours worked in the economy. Total hours worked per week were 916.3 million in the three months to November 2011, down 0.2 million from the three months to August 2011. Average weekly hours worked in the three months to November 2011 were 31.5, unchanged from the three months to August 2011.

Source: Labour Force Survey - Office for National Statistics

Earnings

Earnings measures the money received in return for work done, gross of tax. The estimates relate to Great Britain and include salaries but not unearned income, benefits in kind or arrears of pay. Average total pay (including bonuses) was £464 per week in November 2011. In the three months to November 2011 total pay rose by 1.9 per cent on a year earlier, down 0.2 from the three months to October. Average regular pay (excluding bonuses) was £438 per week in November 2011. In the three months to November 2011 regular pay rose by 1.9 per cent on a year earlier, up 0.1 from the three months to October.

Unemployment - September to November 2011:

Unemployment measures people without a job who have been actively seeking work and are available to start work if a job is offered. The unemployment rate was 8.4 per cent in the three months to November 2011, up 0.3 percentage points from the three months to August 2011 and up 0.5 from a year earlier. Unemployment rates are calculated, in accordance with international guidelines, as the number of unemployed people divided by the economically active population (defined as those in employment plus those who are unemployed).

The number of unemployed people was 2.68 million in the three months to November 2011, up 118,000 from the three months to August 2011 and up 189,000 from a year earlier. The number of unemployed men was 1.56 million in the three months to November 2011, up 59,000 from the three months to August 2011. The number of unemployed women was 1.13 million in the three months to November 2011, up 59,000 from the three months to August 2011. The number of people unemployed for over one year was 857,000 in the three months to November 2011, down 10,000 from the three months to August 2011. The number of people unemployed for over two years was 424,000 in the three months to November 2011, up 1,000 from the three months to August 2011.

%

Young people in the labour market

From September to November 2011:

In the three months to November 2011, there were 3.64 million 16 to 24 years olds in employment, down 28,000 from the three months to August 2011. There were 2.62 million economically inactive 16 to 24 year olds (most of whom were in full-time education), down 33,000 on the three months to August 2011. There were 1.04 million unemployed 16 to 24 year olds, up 52,000 from the three months to August 2011. The unemployment rate for 16 to 24 year olds was 22.3 per cent in the three months to November 2011, up 1.0 percentage points from the three months to August 2011.

In accordance with international guidelines, unemployment rates are calculated as the number of unemployed people divided by the economically active population (defined as those in employment plus those who are unemployed). Movements in youth unemployment rates can therefore be affected by changes to the economically active population, which can result from changes in the number of young people who are economically inactive because they are in full-time education.

In accordance with international guidelines, people in full-time education are included in the youth unemployment estimates if they have been looking for work within the last four weeks and are available to start work within the next two weeks. Excluding people in full-time education, there were 729,000 unemployed 16 to 24 year olds in the three months to November 2011, up 8,000 from the three months to August 2011. The corresponding unemployment rate was 20.7 per cent of the economically active population for 16 to 24 year olds not in full-time education, up 0.5 percentage points from the three months to August 2011.

Young people (aged 16 to 24) in the labour market from September to November 2011

Redundancies

The redundancies estimates measure the number of people who have been made redundant or have taken voluntary redundancy. In the three months to November 2011, 164,000 people had become redundant in the three months before the Labour Force Survey interviews, up 14,000 from the three months to August 2011 and up 5,000 from a year earlier. The redundancy rate was 6.6 per 1,000 employees, up 0.6 on the previous quarter and up 0.2 on a year earlier.

Vacancies

Vacancies are defined as positions for which employers are actively seeking to recruit outside their business or organisation. There were 463,000 job vacancies in the three months to December 2011, down 2,000 on the three months to September 2011 and down 18,000 on a year earlier. There were 1.8 vacancies per 100 employee jobs in the three months to December 2011, unchanged on the previous quarter but down 0.1 percentage point on the year.

The Claimant Count

The claimant count measures the number of people claiming Jobseeker's Allowance (JSA) and differs from unemployment (which measures people who meet the internationally agreed definition of unemployment). The claimant count can be affected by changes to the overall benefits system. For example, from late 2008 until mid-2011 changes in eligibility rules for Lone Parent Income Support resulted in fewer lone parents (predominantly women) being able to claim that benefit resulting in more lone parents claiming JSA while they look for work. From April 2011, the Dept. for Work and Pensions has been re-assessing claimants of Incapacity Benefit (IB) resulting in some people who have been declared ineligible for IB claiming JSA while they look for work. The effect of this exercise on monthly changes in the claimant count is likely to be small.

The claimant count in December 2011 was 1.60 million, up 1,200 on the previous month and up 142,400 on a year earlier. The claimant count rate was 5.0 per cent, unchanged on the previous month but up 0.4 percentage points from a year earlier.
